

OEE Improve! Insights

For condition-based maintenance
of your production equipment

OEE Improve! Insights

By continuously optimizing your overall equipment effectiveness (OEE), you can improve on equipment availability, the performance of your manufacturing processes, or the quality of your products. Simply put, it's worth investing in monitoring your equipment.

Are you wondering how to go about it? These days, you don't need large-scale IT projects and up-front investment. With OEE Improve! Insightsⁱ⁾, you subscribe to a pay-per-use service. Bosch will provide you with a plug-and-play kit that contains everything you need to quickly and easily assess which are the key points in your equipment – and for your centralized early warning system for your equipment's general condition status. The key data is collected via sensor nodes, and immediately displayed for your reference in pre-configured dashboards. These can be easily adapted to meet your individual requirements.

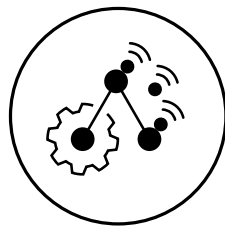

Plug and play. Get started with Bosch today. Improving your OEE is now easier than ever!

Plug-and-play Insights kit

What you get from us:

- Plug-and-play**
- Wireless sensor nodes for recording temperature, magnetic fields, acceleration, and light
