

# Production Performance Starter Kit

For a fast way in to Industry 4.0, start by monitoring and analyzing your manufacturing data

Monitoring and analyzing production data is an essential part of Industry 4.0 projects and a decisive factor in optimizing the production process. Launch your Industry 4.0 project with the Production Performance Starter Kit, including consulting, training, and the Nexeed Production Performance Manager (PPM) software solution<sup>1</sup>.

## Demo license

- ▶ Valid demo license for three months
- ▶ Nexeed Production Performance Manager (PPM) basic module, Ticket Management Module, Process Quality Module, Data Processing Module, and IoT Gateway Module
- ▶ Integration of up to 10 devices

## Provisioning of Starter Kit

- ▶ Option 1: Provisioning and operation of PPM:
  - On Bosch infrastructure or external virtual private cloud (e.g. Azure)
- ▶ Option 2: Remote PPM installation on customer's hardware:
  - Hardware must fulfill PPM system requirements, and secure remote access must be provided for installation purposes

## Use case workshop on-site

- ▶ One-day workshop to collaboratively identify a suitable use case on-site, incl. preparation
- ▶ Remote use-case support included as follow-up

## Remote support

- ▶ Up to four days of remote support during the three-month period for:
  - Questions related to PPM, IoT Gateway, and use-case implementation
  - Connection of one device by configuring an existing integrator (cannot be used for production purposes)

## User training

- ▶ One-hour user training online for the basic functions of the Nexeed Production Performance Manager
- ▶ Tutorial videos for major functions of the Nexeed Production Performance Manager

1) Additional services and add-ons can be provided, depending on customer need and use-case specification.
